SITUATION SUMMARY

Commercial Structure Fire, Gilroy, Santa Clara County (Final)

On 4/23/16 at 1848 hours, the California State Warning Center (CSWC) received a Hazardous Spill Report from Gilroy Fire Department. The report stated that a commercial building that stored large amounts of cyanide and acid was on fire. The water runoff from the fire suppression effort impacted a storm drain and it was unknown where that storm drain leads to. Local residents had been asked to shelter in place.

- Per Gilroy dispatch, Gilroy generated spill report based upon a business plan indicating hazmat quantities on site however a responsible party from the business, Med Tech International advised Gilroy Fire that there were no hazardous materials stored on site.
- Fire hazmat units monitored the water runoff from suppression activities and was determined to be normal for a structure fire.
- Local Environmental Health Department was notified.
- By 2045 hours the fire was knocked down, overhaul had begun and the shelter in place was lifted
- Cal OES Duty Officers were monitoring the situation and providing updates as they became available.

Riverside County- Coachella Music and Arts Festival Saturday and Sunday, Indio

- This is the second weekend of the annual music and arts event held at the Empire Polo Club.
- Estimated weekend attendance is 80,000

SITUATION SUMMARY

Los Coyotes Indian Reservation, San Diego County

As a result of rains and flash flooding on the Los Coyotes Indian Reservation in San Diego County, Mission #2016-Southern-22320 was approved to address the community life safety needs, road repair, and other critical concerns in conjunction with FEMA, Bureau of Indian Affairs (BIA), Cal OES Southern Region, Cal OES Tribal Advisor, Caltrans Region XI, San Diego County OES, and Los Coyotes Tribal personnel.

- Caltrans installed five (8'x12') steel plates along with safety signage to provide temporary road stability and improved access over the Los Coyotes Reservation's only life line road. Delivered and installed on Saturday 4.16.16.
- The road is currently stable with one lane closed
- Stakeholders will continue to monitor the situation to provide long term solutions.
- Per the Cal OES Southern Duty Officer (SDO), due to miscommunication between BIA and Tribal personnel, BIA will conduct another site visit on 04/25/16.
- The Tribe has applied for a US Army Corps of Engineers (USACE) funding waiver for repairs. USACE assessed the road and is awaiting BIA assessment
- All further action is on hold pending the BIA assessment.
- National Weather Service is providing the Tribe with daily spot forecast data. There is currently a potential for precipitation on 04/25/16 which may cause additional road damage
- Emergency preparations in place, including food and generators staged with the Viejas and San Manuel Tribes offering assistance (no monetary contributions)
- The Cal OES Southern Region Tribal Point of Contact, Territory Representative, and SDO continue to monitor the incident.

SITUATION SUMMARY

Weather of Concern

Northern California

- Strong and gusty northwest winds are forecast from late this afternoon through the evening. The strongest winds will be near the coast.
 - Sustained wind speeds 20 to 30 mph with gusts 40 to 50 mph.
 - Blustery conditions are forecast once again on Monday afternoon, but winds then are not expected to be as strong as late in the day today.
- For Northwestern California, another cold front arriving today will send temperatures tumbling tonight. Frost will likely be more widespread Monday night due to lighter winds.
- In the Sierras, showers and isolated thunderstorms are expected to develop late this afternoon as low pressure approaches Northern California. In addition to dangerous lightning, these storms may produce small hail, localized heavy rainfall, and wind gusts up to 40 mph.

Southern California

- Gusty Northwest winds are expected through Monday night for much of the region. Dangerous driving conditions are expected, and downed trees and power lines are possible.
 - Wind gusts up to 55 mph in the Kern County Mountains and Desert, with gusts to 70 mph or higher possible through and right below the passes Monday afternoon and evening.
 - Potential for near zero visibility from blowing dust in the Antelope Valley
 - Gusts up to 40 mph on the west side of the San Joaquin Valley.
- High Surf for the Central Coast and elevated surf south of Point Conception. Strong rip currents and longshore currents are expected for most beach areas, and minor beach erosion will be possible.

WEATHER

WEATHER SYNOPSIS BY REGION:

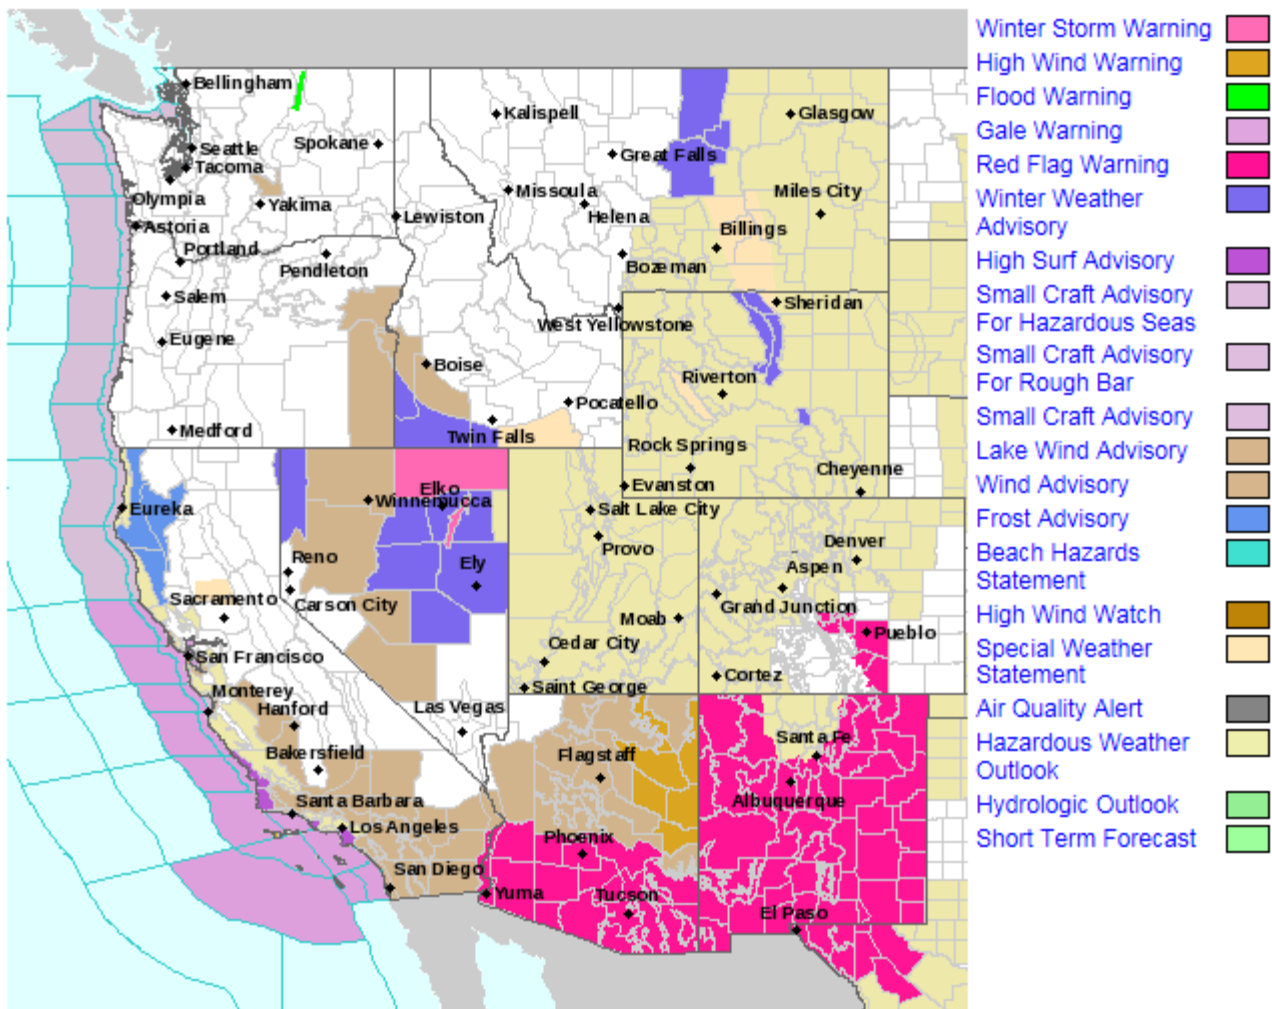

NORTHERN CALIFORNIA

A trough over the Pacific Northwest is deepening over the region today and may bring some showers to the mountains or an isolated shower to the valley. The models show very good instability this evening but there is not much available moisture to trigger anything in the valley. The limited potential for thunderstorms over the mountains looks good. The center of the trough will be over Central Nevada on Monday and may bring some wrap around moisture and showers to the Sierra Nevada. Snow levels look to be around 7000 feet during the day. Most other areas should remain dry, cool with breezy to locally windy northerly winds for the valley. Tuesday will be dry and warmer as a ridge builds over the area with lighter northerly flow. The dry weather looks short lived as another system moves into the region Tuesday night and Wednesday.

SOUTHERN CALIFORNIA

A dry front is moving through Southern California. Colder air behind the front will tap into the 100 KT jet aloft and produce northwest winds tonight through Monday night, with Monday bringing the strongest and most widespread winds overall. Wind advisories cover much of the area, and even those not under a wind advisory will see breezy conditions at times. With the strongest winds around Point Conception. These winds will also push winds up against the northern slopes later tonight and some light showers are likely. Snow levels will lower through the night and should settle down near 5000 feet. There is a 10 percent chance that the snow levels come in low enough to produce a light snow shower over the Tejon Pass/Grapevine area, but it should not stick.
